MetroCare is Dallas County's largest provider of behavioral health and developmental disabilities services. Source Building Group is serving as Construction Manager at Risk (CMAR) for this project which consists of expanding the facilities by redeveloping its current ten-acre campus. It adds a new one-story 45,300 square feet clinic that will include behavioral health service departments for patients of all ages. The redevelopment project will also include a new 258,700 square feet client services building comprised of two levels of Class A administrative office space, a commercial kitchen and wellness center above a mixed-use podium that will include parking garage and some additional complimentary client services.

The Clinic Building will be designed to achieve LEED Gold Certification and the Client Services Building is designed to achieve LEED Platinum Certification. Photovoltaic panels, electric car charging stations daylighting and energy-efficient glazing are some of the key sustainable features incorporated into this project.

The new Texas A&M University Law and Education Building will be a great addition to the City of Fort Worth's downtown landscape. It is the first of a planned three to four building campus expansion into the downtown area that will enhance the footprint of university while also ever-changing the skyline of the city. The eight-story facility will offer a variety of academic programs that includes law, engineering, medical technology, nursing, and additionally feature other workforce training and development programs that are region specific. Stantec will serve as the architect of record for the Law and Education Building and provide lab planning services on the project in partnership with the design architect, Pelli Clarke & Partners.

The construction management teams are Turner Construction Co., CARCON Industries, Source Building Group Inc. and Dikita Enterprises.

Source Building Group, Inc. serves as a CMAR Partner for this project that consists of three buildings (five-story 349,158 square feet adult services, four-story 285,265 square feet children services, and a 686-space parking garage). The primary activities within the new facility are eight inpatient units (one med psych, one dual diagnosis, one forensic, two mood disorder, three psychotic), unit occupational therapy and rehab programs, administrative spaces, as well as dining and living spaces. Shared between all inpatient units are adjunctive therapy programs and spaces including multipurpose therapy supporting music therapy, art therapy, gardening (horticulture), physical education, shared community dining space, shared outdoor gardens/courtyards, chapel, and life skills therapy.

An Interventional Psychiatric service is available for use by both inpatients and as an outpatient service with an adjacent partial hospitalization program for an anticipated small outpatient service. Additional spaces are included throughout to support the UTSW Teaching and Research Programs with learning spaces as well as a centrally located education suite and research suite.

Date Completed:	November 2025

Source Building Group, Inc. serves as General Contractor for this Dallas ISD project that consists of a new 17,173 square foot single-story twelve classroom school building in addition to an existing school campus with 53,195 square feet renovation. A portion of this classroom building will be constructed as 5,555 square feet tornado storm shelter. The project also includes new construction for a 4,120 square foot single-story school lobby and an administration office building addition.

The renovation work is for limited areas that include the existing school offices, school nurse area and classroom areas to bring to new school district standards specifications. This includes items such as material finishes, millwork, and other miscellaneous items. Renovation also includes updated work to selective mechanical, electrical, plumbing, and special systems. There is new site work on school campus relative to new building addition areas, new grading, new and modified accessible walkways, ADA ramps between existing and new building, new playground with relocation of existing playground equipment and two canopy frames complete.

Date Completed:	December 2022

Red Bird Mall was once a thriving pillar of the southern Dallas community but as time passed, the mall traffic decreased as new options began to emerge in nearby cities. The SEARS building was a key anchor store during the mall's early years, but declined as well as new market options began to compete.

Healthcare needs and access in the southern Dallas sector has always been a challenge for the area. After many years of abandonment, a new vision was conceived by a developer to breathe new life into this building while also serving the community in a new way.

Source Building Group, Inc. served as the Construction Manager at Risk Partner for this UT Southwestern Medical Center at Redbird tenant finish-out. The scope of work for this project included clinic spaces, pharmacy and lab work area, endoscopy, infusion therapy and infusion healing garden, women's diagnostic imaging, offices, administration area and vehicular drop off plaza with canopy.

*PARTNERED WITH WHITING-TURNER

Contract Amount:	\$90,000,000
Litigation Issues:	None
Verified Safety Violations:	None
Change Orders:	None
Date Completed:	August 2023

A new science, technology and capable learning environment were created to foster a new age of growth and development.

UT Southwestern, UT Dallas and Texas Instruments collaborated to create a space that will challenge the sharpest minds across the globe. The new engineering and science building was designed to build a new innovative educational environment for research that will unlock new levels of discovery. The facility will support and house the work of industry professionals and their research teams with wet and dry laboratory spaces, areas designated to promote multidisciplinary interactions, and a Biodesign Center that features a large assembly/design studio, a metal fabrication shop, and rooms for 3D printing.

Source Building Group, Inc. served as Construction Manager at Risk Partner (CMAR) for this project. The scope of work for this five-story 150,000 square foot facility consisted of creating public spaces, administration suite with shops and fabrication suite on the ground floor of the building. Second through fourth story work was designed for the research lab spaces.

*JOINT VENTURE WITH SATTERFIELD & PONTIKES CONSTRUCTION, INC.

Original/Final Cost:	\$22,000,000
Litigation Issues:	None
Verified Safety Violations:	None
Change Orders:	None
Date Completed:	February 2021

Source Building Group, Inc. served as the 60% Joint Venture General Contractor in delivering the 72,895 square feet new facility. Spanning two-stories, the building replaces three older structures and consolidates operations into one centralized location. The County Tax Office, County Constable, Veteran Affairs, Sheriff's Dispatch and Traffic Division, Dallas County Courts, and two Justice of the Peace Courts.

The LEED Silver Certified facility is designed with an abundance of amenities and essential items to ensure its occupants can be successful. The project included new cast on site concrete tilt wall exterior mixed with curtainwall and masonry. The interiors included new state of the art MEP Systems, with high end finishes and a wellness room for new mothers. Additionally, an impressive art installation has been incorporated throughout to celebrate and acknowledge civic leaders. A public walking trail also doubles as a space for peace officers to train while the new fitness and weight training room ensures officers are in optimal physical condition.

Date Completed:	June 2021

Having served as the 60% Joint Venture General Contractor in delivering the 27,000 square feet new ground up facility, this project is now the central training academy for both sworn peace officers and new cadets within Dallas County. The Dallas County Sheriff's Department, Constables and Dallas County Hospital District Police all utilize the facility for training and continuing education as needed.

Comprised of three lecture halls for instruction with additional classrooms and instructor observation areas, the academy also includes the latest in digital technology, CrossFit training, weights, and communications. There is also an adjacent running trail that is shared with the neighboring community to increase visibility and trust while also producing highly skilled public servants for the City of Dallas.

The new academy has a new masonry exterior mixed with curtain-wall and stone for an aesthetically pleasing design. The interiors include new state-of-the-art MEP Systems with high-end finishes. The project also includes a new parking lot and radio tower.

Change Orders:	None
Date Completed:	August 2024

Source Building Group, Inc. served as General Contractor for the City of Arlington's John F. Kubala Water Treatment Plant Main Laboratory and Maintenance building's new construction and renovation project. The new construction consisted of a 21,785 square feet single-story water treatment plant laboratory and maintenance building with masonry, metal panel cladding and standing seam metal roofing. The laboratory areas included benchtops, casework, and fume hoods. The administrative areas house offices, workspaces, training rooms and other essential facilities. The maintenance bay space contains offices, open bay areas for light work and plenty of ample storage. The renovation portion of the project consisted of 14,639 square feet of existing laboratory and administrative areas that remained in operation during construction.

Date Completed:	August 2023

The October 2019 storms brought tornado damage that left the original Walnut Hill Elementary School damaged and not suitable for use as a learning environment. Source Building Group, Inc. served on this joint venture project that consisted of the renovation of the existing structure of approximately 55,000 square feet and the addition of 110,000 square feet of new construction. The result is a new state-of-the-art 9-12 grade innovative technology center for Dallas Independent Schools renamed as the Career Institute North. The facility now offers and prepares students for exciting in-demand careers ranging from aviation and construction to healthcare and transportation.

*Joint Venture with Satterfield & Pontikes Construction, Inc.

Contract Amount:	\$41,694,466
(40% JV Partner)	
Litigation Issues:	None
Verified Safety Violations:	None
Change Orders:	None
Date Completed:	August 2020

Phase I construction for the David W. Carter High School included key additions and renovations that were sorely needed for this facility with a vast legacy. Source Building Group, Inc. served as the 40% Joint Venture General Contractor in delivering the new additions and phased renovations at the historic high school in Dallas, Texas.

The main focus of work included a new gymnasium addition which also added a below-grade tornado shelter constructed to house the entire population of the school. The existing gym space was renovated into an auxiliary gym with athletic support space and storage spaces, and the older locker rooms were given new life as well.

Additional upgrades for the project included a fine arts addition, new office administration spaces, new science labs along with a total interior demolition and reinstallation of new MEP Systems and finishes with new landscaping for two interior courtyards of the facility.
